DISCUS
where feet meet design

'My work requires me to sit at the computer for long periods. Despite a good office chair and regular breaks, my legs often started feeling numb during the course of the day.

Fortunately, my workstation was assessed recently. What do you think the problem was? After my chair had been adjusted to the right height for my desk, my feet did not touch the floor. This created pressure under my thighs which, in the course of the day, brought about the discomfort in my legs.

To prevent this, an ergonomic footrest was recommended. In our organisation, both function and design are highly regarded. This made the "Discus" an obvious choice.'

It's a modern uniquely-shaped footrest with instant gas-lift height-adjustment which can be changed with your foot from a seated position.

DISCUS 150

- Height adjustment 5 -15 cm
- The footrest has an inclination angle of 5°
- Provided with a non-skid profile
- Load capacity up to 80 kilogrammes

where feet meet design

DISCUS 250

- Height adjustment 15 - 25 cm
- The footrest has an inclination angle of 5°
- Provided with a non-skid profile
- Load capacity up to 80 kilogrammes

The "Discus" is manufactured from high quality materials, guaranteeing many years of user satisfaction.

The steel base ensures a sturdy and stable construction. The aluminium column conceals the gas spring and the foot plate is made of impact-proof ABS.

The "Discus" has been thoroughly tested, undergoing more than 80.000 up and down cycles, which is equivalent to 25 years of intensive use!

In short, ergonomics and design come together in the "Discus",

"where feet meet design".
